

संस्कार दीक्षा

Childhood is a beautiful journey, Not a race...

We consistently and consciously use the feminine pronouns (she, her) to denote both genders. Read it as 'he/she & his/her'.

Sanskar Deeksha is consisted of psychologists, educationists, educators and motivators. From last more than one decade, team Sanskar Deeksha is indulging its core efforts into the field of educational research and child psychology. We are replacing the flaws of current education system with our self-developed and analyzed teaching & learning pattern. We train parents as well as teachers not just for the child's academic excellence, but also for various crucial exams of a child's life. We teach parents and teachers to create a fear free, pleasing and motivating environment for learning and living. Stress and fear are big hinders for our ability and expertise, in such kind of environment, we even lose what we already have. So, how could we expect from our children to learn new things under such stress and fear. Sanskar Deeksha has a remarkable hold over the applied pedagogy. Our pattern (Techniques, Training, Contents, Teaching and Learning Material) is a wonderful blend of our researches & analysis work along with great extracts from various education systems round the globe.

Sanskar Deeksha strongly disapproves the term “Weak Child” just on the behalf of a grade card. In fact, it's the weakness of both parents & teachers who are incapable to judge the child's skills, aptitude and learning style. Every child has some innate talent, no one can set down a child incapable/weak just because of less score in few subjects. Sanskar Deeksha provides all kind of expert solutions related to child development, education and parenting. All the institutions running under Sanskar Deeksha's guidance are enjoying the adaptable environment and writing the new definition of education. In this all new environment, children joyfully develop their cognitive skills and head towards a successful life along with a bright career.

From founder's pen...

My this message is for all the parents & teachers who are aware of their ward's education and also worried about today's educational scenario. Education is not just confined to academics or curriculum, actually it's holding a vast meaning in itself, which touches every aspect of our lives. And it's not confined to schools as well. Learning is a natural process which get developed spontaneously in a child, so both parents & teacher hold a big responsibility to shape the whole life of a child, not merely her career.

Either in teaching or in parenting, necessary lessons are must to learn before handling a child. Modern educational resources & extensive use of technology in early education is like giving crutches to a physically fit child and depriving her to utilize her great natural efficiency. Sanskar Deeksha is committed to transform the miserable lives of our little ones, we at least expect from you too to bring some positive changes in lives of your own children and students. Every child owns tremendous capabilities and abilities, even hundred times more than your expectations. You just need to find the pass key of this super brain to explore and bring out these capabilities. We train and guide you how to know about your child's skills & talent.

I proudly say that Sanskar Deeksha is a ray of hope in today's misleading educational environment. According to the renowned educationist Maria Montessori "One test of correctness of educational procedure is the happiness of the child". The same we are doing at all the institutions which are associated with Sanskar Deeksha. Here we support natural phenomenon of learning rather than to interrupt it. To be the best doesn't require any expensive or rare resource, the only thing it requires is "A Big Zeal" to be the best. If you have the zeal then we have the world's best techniques & trainings to make you the best. I invite institutions, teachers and parents, let's jointly indulge our core efforts to bring some most necessary changes in the current education system and let blossom our coming generations.

I am used to say: "If you get transformed then certainly your child is going to attain the great capability to transform the society."

Books/Academic Contents (Books, Workbooks etc.) & Other TLM:

After studying various education systems, theories and analyzed research results we have developed academic curriculum/contents and TLM (Teaching & Learning Material). Today most of the books, notebooks, TLM available in the market have no concern with child's development and rather result in an incurable harm to child's development and hinder the natural growth. Manufacturers and publishers of these kind of teaching and learning materials probably know-nothing as far as the education field is concerned. They are neither educationists nor educators, they are corporate and marketing expert people, who just know how to sale, not what to develop. So Sanskar Deeksha is playing a crucial role in innovative & adaptive content designing.

Notebooks, Practice books & Writing tools:

Sanskar Deeksha has developed this awesome Handwriting Program by including some studies, researches, status of a child's fine motors development and some physio-psychic practices/techniques. Handwriting is an essential skill for both children and adults. So our unique and technical handwriting program is very empowering for an adult as well as a preschooler. Our notebooks improves the particularly weaker aspect of a child's writing ability. The purpose of this program is to make a child to write legibly, fluently, without strain, and with sufficient speed for all practical purposes. Apart from our notebooks, we also incorporate some very effective practices in writing to bring amazing results. So, Sanskar Deeksha provides adequate training for all it's programs along with required practices/exercises.

Creative Learning and Teaching skills Development:

As we have developed our scientific, logical and proven TLM, likewise we have developed some unique techniques with which we can help an individual student to bring out and accentuate her performance. It is only the way which decides whether learning is going to be an interesting and fun activity or a boring mundane classroom. Not only students but also the teachers love this new way of learning & teaching. In this manner children learn much more than their course wares. Children have enormous capability to grasp, what all we need to do is just adopt the right way.

Parenting Skill Sessions/ Workshops/ Counseling:

Effective Education is a combined and co-ordinated effort of both, teacher and parent. Expecting a complete education without a proper parenting skill training, is a hard nut to crack. And it is most necessary to know everything about the child and parenting before we put our expectations on the child. Speaking of the other aspect, school's crucial and top level team often wastes its very important and productive time to encounter parents' silly concerns & issues. PTM date is like day of war for a school administration and teachers. Again, we have done a great job in this field too, which definitely will bring a sigh of relief to the school administration and teachers. And parents surprisingly would turn out into obedient, co-operative & encouraging fellows.

Teacher Motivational Sessions/Counseling:

Before implementing an amazing technique/procedure, it is must to comfort, motivate, empower and capacitate teachers to adopt the new concept with great enthusiasm. Teacher's training regarding any new concept is worthless until teachers are first taught to be a teacher, think like a teacher and act like a teacher. We do the same practices and results are amazing. Worthiness of these kind of sessions can only be attained by conducting sessions frequently. Yearly or half yearly sessions have no significance. So, institutions need to adopt the right way.

Child Motivational Sessions:

What we do with teachers for a successful implementation of a productive tactic, same is necessary for the children too, but in a completely different manner. By following this magical theory of ours, you get rid of the numerous problems caused by children. After conducting these kind of sessions, school looks like a smooth and automated machine. These sessions also keep children stress and depression free, energize and motivated.

Dermetoglyphics Multiple Intelligence Analysis (DMIA):

DMIA is the science of fingerprints and their correlation with brain. It gives an analysis of inborn skills, talents and strengths of a child. It also tells us about child's Personality, IQ (Quotients), Brain Dominance, Learning Styles, Gross & Fine Motors score, Multiple Intelligence distribution and suggested Professional Career/Field. It has a great scope for the institution to guide and shape up a child in annotated manner. Parents and teachers can be supplied with exact instructions based on the whole analysis report to meet the required level of development.

School ERP:

With our experience, expertise and understanding of an institution's information flow & enquiries, we have developed an amazing school ERP using all the latest features and considering today's requirements. It allows an institution to generate customized reports in various ways for tracking the working of the entire institution. School ERP comes with Offline, Online mode, complete access control, Multi user, Single user mode & App for individual student/parent and teacher. Complete management and enquiry handling of :

- Student
- Fee
- Exams
- Stock
- Attendance (Biometric/RF)
- Teaching Staff
- Admission
- Time Table
- Income & Expenditure
- Non-teaching Staff
- Transportation
- Library
- Balance sheet

Hypothesis:

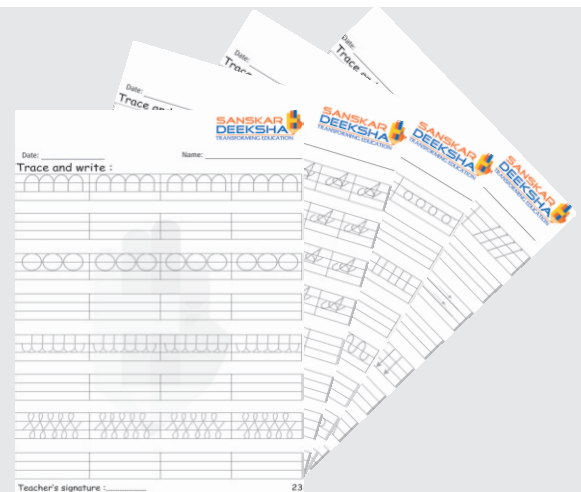

Our researches shows that latest learning aids, digital teaching techniques, expensive infrastructure, glossy books and eye-catching resources never guarantee a perfect learning and holistic growth. Apart from all these resources, the most necessary fact is to know each child's intellectual & psychological capabilities and weaknesses. And there

are several techniques and technologies which are helpful for this. World's best educational institutions are following these techniques and here we are the experts to provide technical and specialist support for this unique concept. We not only give you a unique identity within your region, but also take you to the national level platform to make your own identity among the esteemed institutions. We have all the in-house skills and resources needed for an educational institution to nurture the child individually. Apart from the books, notebook, TLM, teacher's training/ sessions etc, there are some very important practices for children, teachers and parents to add the required support for achieving wonderful results.

How do we serve...

Apart from our products and services, within an institution Sanskar Deeksha conducts workshops, seminars, counseling, curriculum & TLM training and open discussion sessions to give a new definition to the school education. Our experts introduce our technologies and procedures to teachers and parents with adequate training. All our techniques and methods are scientific, logical, tested well & analyzed.

Throughout the year we study various education systems around the world, visit institutions, attend conferences, conduct seminars, workshops and organize training & counseling session all over India. But it's not possible at all for a school administration to remain away from the school for several months to obtain these educational extracts. So, we feel pleased to offer our services, experience and expertise to anyone, who is open to learn & keen eager to adopt the required positive changes in education.

Every child deserves Childhood....

Grant it please!
